

Core Features

- Interfaces any MagicBox Player units to PC data sources for automated display updates.
- Powerful drawing tools, customizable layout, and scheduling.
- Reads data source updates automatically.
- Content Management of multiple systems.
- Template design allows for any length of data that will generate multiple pages.

Data Source Support

EZ-Stream has support for a wide variety of data sources which can be divided into two categories: On-Premise sources and Cloud/Web Based sources.

On-Premise - sources that are located on the same LAN as EZ-Stream and can accept an OleDb or ODBC connection (with the exception of XML and CVS files which use standard file I/O for access).

Cloud/Web Based - sources that are either hosted in the Cloud by a 3rd party or are installed on a web server and require a web based API to access.

On-Premise Sources	Relational Databases (i.e. Microsoft SQL Server, Oracle, Microsoft Access)
	XML/CSV Files
	Microsoft Excel
	Dean Evans' EMS
	PeopleCube's Resource Scheduler/Schedule Plus
	Lotus Notes
	EmergingSoft MeetingPlanner
Cloud/Web Based Sources	Microsoft Exchange Server 2007/2010
	Newmarket International Delphi
	CollegeNET R25
	Google Calendar
	NetSimplicity Meeting Room Manager
	XML/RSS/CSV

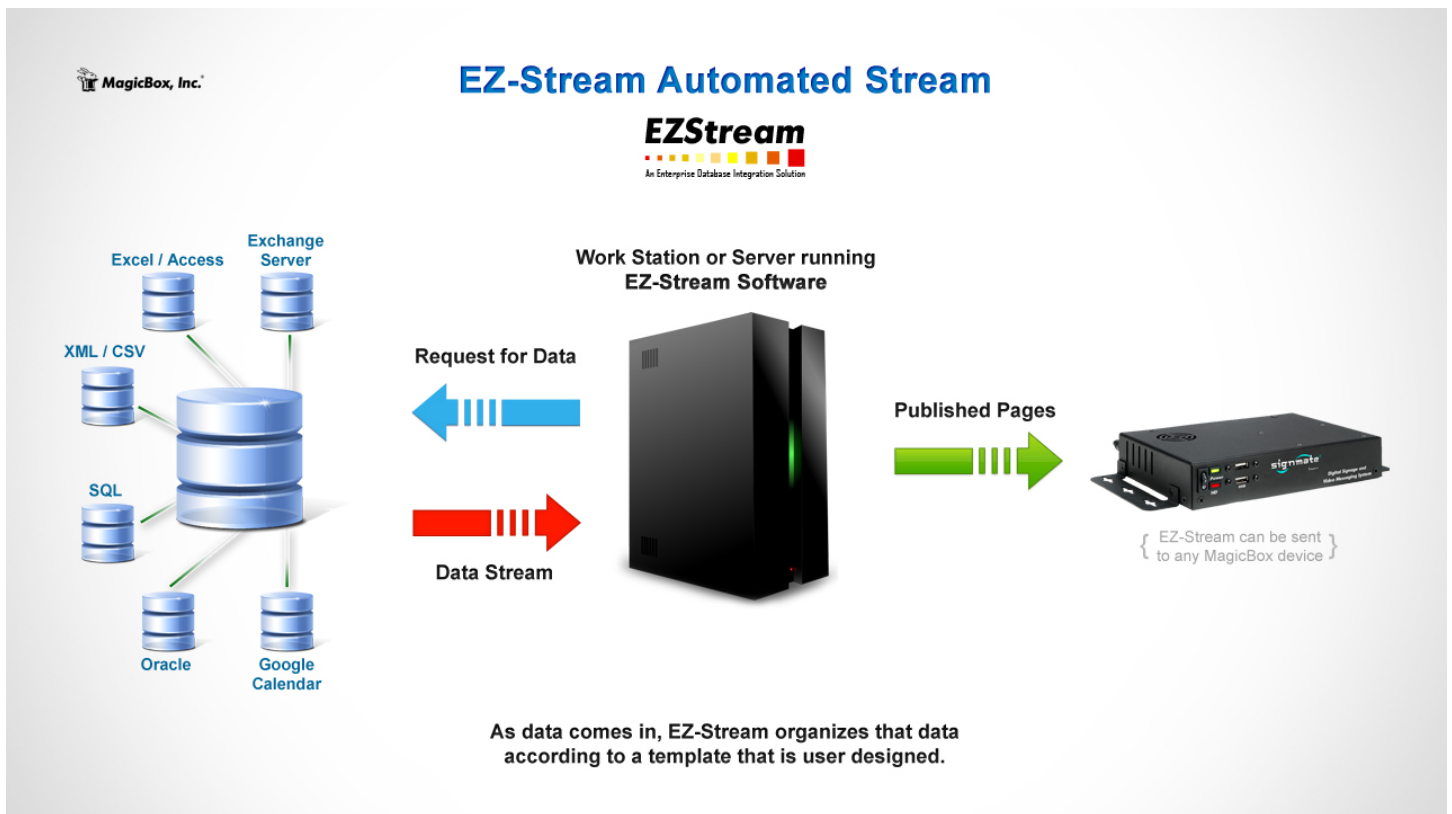

Specifications

Images Supported	JPG, BMP, PNG, GIF	
Output Resolution	Any	
Operating Systems	Windows 2000, XP, Vista, 7, Server 2003/2008	
HDD Requirements	30 MB	

Installation Details

EZStream uses a Windows Service to check for new information on a user defined interval. This is accomplished by EZ-Stream opening a connection to the data source, querying the data, and closing the connection. Only the data fields that are needed are queried. If new information is found, new content will automatically be rendered and sent to the designated player unit.

The PC or Server that contains EZ-Stream must be able to have a direct TCP/IP connection to the player unit, as well as network access either via direct TCP/IP or via the Web to the desired data source (depending on whether the source is On-Premise or Web Based).

Ordering Info

AVEZS – EZ-Stream as an added option to any Avelin or Memo Player.

AVCAFL – Avelin Café unit bundled with EZ-Stream

RR057P – RoomRoster room sign with EZ-Stream

AVEZSD – (Optional) Design and implementation support

AVEZSSA – (Optional) Software assurance and support package
